

Lalit Ravindra Suryawanshi

Plot No 150 , Dwarka Nager,Biladi Road Deopur, Dhule – 424005

Email: lalitsurya015@gmail.com

Phone: 9172697427

OBJECTIVE

A motivated B.Tech student with a strong foundation in Data Analytics, SQL, Power BI, Python, and Machine Learning. Skilled in transforming data into actionable insights through dashboard development, data analysis, and predictive modeling. Seeking an opportunity to leverage my technical and problem-solving abilities in a growth-oriented organization while continuously learning and contributing to business success.

EDUCATION

Bachelor of Technology (BTech)

Third Year(Ongoing)

Shri Vile Parle Kelavani Mandal's Institute of Technology (SVKM-IOT) Dhule, Maharashtra, India

Expected Graduation: 2027

Maharashtra State Board 12th Exam

Percentage: 62%

S.T.T.K Mahajan Jr Collage, Deopur, Dhule, Maharashtra, India

Year of Completion: 2023

Maharashtra State Board 10th Exam

Percentage: 84%

Ekvira Devi High School,Deopur,Dhule, Maharashtra, India

Year of Completion: 2021

SKILLS

- **Data Analytics & Business Intelligence:** Moderate knowledge of Data Analysis and Its related concepts also capable to handle large data and able to make useful Insights .
 - **Programming Languages:** Python programming, with basic knowledge of c, c++
 - **Linux:** Moderate knowledge of Linux systems, familiar with Ubuntu.
 - **Power BI:** Skilled and Experience in data modeling, visualization, reporting, DAX Basics and Business Insights .
 - **Tools:** Excel, SQL, Tableau, Python, MySQL, Git/GitHub ,WEKA.
 - **Data Warehouse & Data Mining:** Have knowledge of ETL process, Data Integration, OLAP Concepts, Pattern Discovery, Trend Analysis, Data Exploration.
 - **Communication:** Able to effectively communicate with clients, team members, and management.
 - **Problem-solving:** Strong analytical and troubleshooting skills.
-

PROJECTS

- **E-Commerce Sales Dashboard (Power BI):** Developed an interactive sales dashboard using Amazon e-commerce data to analyze sales trends, product performance, and key business metrics through data visualization and reporting.
- **Customer Intent Predictor:** Built a machine learning model to predict customer purchase intent based on user behavior and historical data, supporting data-driven decision-making.
- **Waste Segregation System:** Developed an AI-based waste classification system and created a custom dataset of over 20,000 images for training and testing the model, enabling automated waste categorization using machine learning techniques.
- **Electronic Health Record (EHR) System:** Designed and developed a healthcare record management system using SQL, implementing DDL, DML, and DCL commands, along with joins, aggregate functions, views, and set operations for efficient data storage, retrieval, and reporting.

INTERESTS

- Data Analytics and Business Intelligence .
- Data Visualization and Dashboard Development.
- Database Management and Data Engineering.
